**Forensic Psychology Practice in Canada: A survey of current practices and attitudes
among Clinical Forensic Psychologists**

Dear Saskatchewan College of Psychologists,

At the University of Manitoba, we are interested in surveying forensic psychologists across Canada regarding their clinical experiences, training in forensic psychology, current clinical practice, and interdisciplinary practice issues.

We are requesting your assistance in distributing our web based survey to forensic and clinical psychologists in your province. We would very much appreciate if you could forward this email to all psychologists, psychologist candidates, and psychological associates in Saskatchewan, if possible.

The following link will direct potential participants to the first page of the survey and provide further information:

<http://www.surveygizmo.com/s3/1596902/Forensic-Psychology-Practice-in-Canada>

Thank you very much for your assistance in conducting our research study. Please contact David Hill at dhill6@hsc.mb.ca if there are any questions regarding this research study.

This study has been approved by the Health Research Ethics Board at the University of Manitoba, Faculty of Health Sciences.

Sincerely,

David Hill, Psy.D.
