Letter of Invitation to Participate

Project title: Motivations for Clinical Supervision

You are invited to participate in a brief survey collecting information about motivation to choose or not choose to engage in clinical supervision. This survey is open to clinical, counselling, school, and neuropsychologists **regardless of whether you are currently providing supervision**. You will be asked to complete 3 brief questionnaires: A demographics questionnaire regarding your training and supervision experience, a questionnaire regarding your motivations for engaging or not engaging in clinical supervision, and a short questionnaire of job satisfaction and compassion fatigue. All questionnaires are **completely anonymous**. Data will be coded using arbitrary participant numbers that will not be associated with any personally identifying information. You may withdraw from the study at any time without explanation or penalty of any sort. **This study is estimated to take 10-15 minutes of your time.**
