

DECEMBER 7, 2018 CANNABIS INFORMATION WORKSHOP

The legalization of cannabis in Canada will have lasting impact on the social, economic, and political realities that we all navigate. The implications of these impacts may bode particular significance for those who face marginalization.

Join in this half-day presentation to better understand the impact widely available cannabis may have for clients accessing mental health services. This workshop will explore the significance for our clients on neurological, physiological, psychological, policy and practice levels.

The presenter, Kira is a CCPA certified psychotherapist and researcher. Having completed her Master's degree at Western University in London, ON, Kira now lives and works in Winnipeg, MB. In her clinical practice she uses a person-centered attachment-informed model, with which she applies an integrative blend of CBT, DBT, and Mindfulness-informed interventions. Kira identifies as a scientist-practitioner and commits to being continually informed of the most up-to-date research and information pertaining to her practice and clients. She is excited and honoured to share this presentation with you, and welcomes further communication and collaboration with those interested.
