

We are seeking individuals willing to complete an online survey. This survey is part of a larger project conducted by Kimberly Dossett (PhD Candidate) and Dr. Graham Reid in Western University's Clinical Psychology Program.

The survey examines the influence of attributes (e.g., service setting, type of provider) on service providers conceptualizations of service intensity in mental health. Service providers will be surveyed across a variety of disciplines (e.g., psychologists, social workers, psychotherapists) in Canada, Australia and the United Kingdom.

The survey is completed online and takes 10-15 minutes. A complete letter of information is provided at the survey link, prior to consent and survey completion. Use the following link to access the survey: [Service Intensity Survey](#)
