

McGill University Research Study on Stroke Management in Canada

Dear Members of the Saskatchewan College of Psychologists,

We invite you to participate in a Canada-wide survey on rehabilitation practices in the management of stroke. This study is part of a Professional Master's Research project at McGill University. The purpose of this study is to investigate how clinicians promote community reintegration following a stroke during the outpatient and/or community rehabilitation phase of recovery.

Nature of Participation

The first few questions will confirm your eligibility to participate and will obtain your consent. Then, you will be directed to a demographic questionnaire. We ask that you perform this survey on your own without discussing study questions or answers with colleagues to ensure the validity of the results. Please click on the link below in your preferred language if you wish to participate in this study.

English Survey Link: <https://surveys.mcgill.ca/ls/551465?lang=en>

French Survey Link: <https://surveys.mcgill.ca/ls/551465?lang=fr>

Duration/Time Commitment

The survey requires 20-30 minutes to complete. Once you start the survey you must complete it in one session, otherwise your answers will not be saved. The survey will be available between June 15th 2018 - August 6th 2018, although we encourage you to complete it as soon as possible.

Benefits of Participation

Participating in this study does not provide immediate personal benefits, however, this study is part of a knowledge translation project seeking to promote best practice in stroke management that is client centered and evidenced based. As such, your participation will promote the advancement of clinical practice.

Confidentiality

There will be no unique identifiers used (i.e. names, email addresses, etc.) that could link your identity to any of the information that you will provide. The questionnaire responses will be transcribed and coded by the research team and will follow proper ethical guidelines to guarantee anonymity and confidentiality. Only aggregate data will be presented.

Collaborators on the Research Project

Sara Ahmed, Principal Investigator

Associate Professor at McGill University, School of Physical & Occupational Therapy

Research Scientist at Centre de recherche interdisciplinaire en réadaptation (CRIR)
514-487-1891, extension 185
sara.ahmed@mcgill.ca

Marie-Josée Malo
Social Worker and Clinical Coordinator
CIUSSS du Centre-Ouest-de-l'Île-de-Montréal
514-487-1891, extension 281
