

Member at Large Nominee: **Nathalie Berard, PhD., R.D. Psych**

Experience & Education

I have worked as a registered psychologist in Regina since 2003. I worked as a master's level psychologist at Child and Youth Services from 2003-2013. After completing a Doctor of Philosophy in the Clinical Psychology program at the University of Regina in 2014, I have been working at the Children's Program, Wascana Rehabilitation Centre, as well as at Prairie Psychology Services. My work has always focused on children, adolescents and their families.

Professional & Community Involvement

I am a Member of the Canadian Psychological Association and the Psychological Association of Saskatchewan.

I previously served on the Membership Committee with the Saskatchewan College of Psychologists (SCP) from 2007 until 2015. I am now interested in volunteering my time again to become a member of the Council and to continue the promotion of psychology in the Province of Saskatchewan. As a Member at Large I hope to represent and advocate for the membership, help direct policy and participate in decisions to promote our profession while addressing challenges facing psychologists. I believe the respectful consideration and valuing of diverse opinions is very important and critical to incorporating a broad perspective on issues and trends affecting psychologists in Saskatchewan today.
