

Member-at-Large Nominee: **Bette Brazier, Ph.D., R.D. Psych.**

Work Experience & Education.

I graduated with a Ph.D. in Clinical Psychology in 2006 from the University of New Brunswick. Matched to the training program in Saskatoon in 2004, I ventured west and never looked back. I was the sole psychologist in Long Term Care for the Saskatoon Health Authority for 10 years, working directly with residents of facilities but also with care providers and the health system hierarchy. I began working in private practice in 2009, and went into full time private work in 2014. My focus has been on health and rehabilitation services, providing treatment, assessment, and consultation for third-party payers.

Professional & Community Involvement

I am a member in good standing with the Canadian Psychological Association, the Saskatchewan College of Psychologists, and the Psychology Association of Saskatchewan. I was one of the founding members of the Saskatchewan Coalition of Rehabilitation Psychologists several years ago, and I served in the role of secretary and communications up until 2023.

As I am in the later stage of my career, I have time to devote to promoting and maintaining the integrity of the discipline of psychology and ensuring that the public is well served by our members and leadership.
